PROFESSIONAL SUMMARY

Senior MERN Stack Developer and Team Lead with 4.8+ years of experience building high-performance, scalable web applications for international clients across Norway, UAE, and Pakistan. Proven track record of remote delivery for enterprise-grade products including DineHome, Norway's 2nd largest food ordering platform, and UAE-based Pangiah. Expert in JavaScript, TypeScript, React, Next.js, Node.js, NestJS, AWS, Docker, and AI-integrated SaaS products. Experienced in leading distributed teams, architecting cloud-native systems, and driving measurable performance improvements of up to 38%.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript

Frontend: React, Next.js, Redux, HTML5, CSS3

Backend: Node.js, Express.js, NestJS, REST APIs

Databases: MongoDB, PostgreSQL, MySQL, Redis, Supabase, Prisma ORM

Cloud & DevOps: AWS, Docker, Git, CI/CD Pipelines

Messaging & Caching: RabbitMQ, Redis

AI & Tooling: AI Integration, LLM Features, Claude API, Cursor

Methodology: Agile, Scrum, SDLC, Code Reviews, Team Leadership

WORK EXPERIENCE

Technical Team Lead & Senior MERN Stack Developer

Hello World Technologies (Client: DineHome, Norway) | Remote | Sep 2024 – Present

Outsourced to DineHome — Norway's 2nd largest food ordering platform

- Led a team of 5 developers in designing and delivering DineHome's core platform serving 15,000+ monthly active users across Norway.
- Reduced application load times by 38% through Redis caching, lazy loading, and database query optimization on a high-traffic real-time ordering system.
- Mentored junior developers through structured code reviews and pair programming, reducing production bugs by 30%.
- Owned technical decision-making on system architecture, technology stack selection, and engineering best practices for a mission-critical platform.
- Implemented scalable microservice patterns and CI/CD pipelines to support rapid feature delivery and deployment stability.

Project Team Lead & MERN Stack Developer

DruDots Technologies (International Client Project) | Lahore, Pakistan | Jul 2023 – Sep 2024

Delivered MedicalRadar.io — a confidential project for an international client

- Developed and maintained scalable MERN stack applications handling 8,000+ active users across multiple client projects.

- Led a team of 2 developers, ensuring consistent quality standards and on-time delivery for all international client commitments.
- Improved application performance by 35% through backend API optimization and frontend rendering enhancements.
- Collaborated directly with international clients for requirements gathering, technical solution proposals, and progress demonstrations.
- Designed and implemented scalable backend architecture with real-time features to support a growing healthcare professional user base.

MERN Stack Developer

ProNode Technologies (Client: Pangiah, UAE) | Remote | Nov 2021 – Jul 2023

Outsourced and working remotely for Pangiah — a UAE-based technology company

- Built TheTutor.me, a full-featured online tutoring platform with video sessions, smart scheduling, student-tutor matching, and integrated payment processing.
- Developed iSalonee, a multi-tenant SaaS salon and spa booking platform with CRM, staff scheduling, appointment management, and responsive UI.
- Contributed to 15+ production deployments across the complete SDLC from requirements gathering through design, development, testing, and deployment.
- Reduced team code defects by 20% through active code reviews and development of reusable React components and backend modules.

KEY PROJECTS

DineHome | Team Lead & Senior MERN Stack Developer

Tech Stack: React, Node.js, Express, MongoDB, Redis, Docker

Norway's 2nd largest food ordering platform with real-time order tracking, multi-vendor management, and payment gateway integration. Led team of 5, serving 15,000+ monthly users.

MedicalRadar | Team Lead & Senior MERN Stack Developer

Tech Stack: React, Node.js, MongoDB, NestJS, WebSockets

Social media platform for healthcare professionals with content feeds, real-time messaging, and scalable backend architecture for an international client.

Doocado | Senior MERN Stack Developer

Tech Stack: React, Node.js, MongoDB, LLM APIs, Multi-tenant Architecture

AI-based SaaS food ordering system leveraging LLM integrations for smart menu suggestions and automated customer interactions with multi-tenant restaurant onboarding.

TheTutor.me | MERN Stack Developer

Tech Stack: React, Node.js, Express, MongoDB, WebRTC, Stripe

Online tutoring platform with video sessions, scheduling, and payment processing. Developed for UAE-based client Pangiah.

iSalonee | MERN Stack Developer

Tech Stack: React, Node.js, MongoDB, REST APIs

SaaS salon and spa booking platform with appointment management, staff scheduling, and customer CRM. Developed for UAE-based client Pangiah.

Splinter | MERN Stack Developer

Tech Stack: React, Node.js, PostgreSQL, Stripe, Prisma

Fintech Buy-Now-Pay-Later (BNPL) product with credit scoring, installment tracking, and secure transaction processing.

EDUCATION

Bachelor of Science in Computer Science

CERTIFICATIONS

Certified Software Engineer — HackerRank | Jan 2026

JavaScript (Intermediate) Skills Certification — HackerRank | Jan 2026

Full Stack Web Development — IT Centre Rahim Yar Khan | Jul 2021
